

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (original) A method comprising:

adding to a first set of broadcasted programs a second set of broadcasted programs, the second set of broadcasted programs including broadcasted programs viewed by a viewer for a period of time at least equal to a first threshold; and

removing from the first set of broadcasted programs a third set of broadcasted programs, the third set of broadcasted programs including broadcasted programs not viewed by a viewer for a period of time at least equal to a second threshold.

2. (currently amended) The method of claim 1, further comprising adding to the first set of broadcasted programs a fourth set of broadcasted programs manually selected by the viewer.

3. (original) The method of claim 1, further comprising updating the first threshold and the second threshold upon the viewer indicating dissatisfaction.

4. (original) The method of claim 1, further comprising updating the first threshold and the second threshold upon the viewer returning to a schedule list more than a predetermined number of times.

5. (original) The method of claim 1, further comprising setting the first threshold to be a first percentage of a period of time that a channel was viewed, and setting the second

threshold to be a second percentage of the period of time that the channel was viewed.

6. (original) The method of claim 1, further comprising: adding to the first set of broadcasted programs a fifth set of broadcasted programs, the fifth set of broadcasted programs including broadcasted programs selected by a viewer a number of times at least equal to a third threshold; and removing from the first set of broadcasted programs a sixth set of broadcasted programs, the sixth set of broadcasted programs including broadcasted programs not selected by a viewer a number of times at least equal to a fourth threshold.

7. (original) A machine-readable medium that provides instructions that, when executed by a machine, cause the machine to perform operations comprising: adding to a first set of broadcasted programs a second set of broadcasted programs, the second set of broadcasted programs including broadcasted programs viewed by a viewer for a period of time at least equal to a first threshold; and removing from the first set of broadcasted programs a third set of broadcasted programs, the third set of broadcasted programs including broadcasted programs not viewed by a viewer for a period of time at least equal to a second threshold.

8. (currently amended) The machine-readable medium of claim 7, wherein operations further comprise adding to the first set of broadcasted programs a fourth set of broadcasted programs manually selected by the viewer.

9. (original) The machine-readable medium of claim 7, wherein operations further comprise updating the first threshold and the second threshold upon the viewer indicating dissatisfaction.

10. (original) The machine-readable medium of claim 7, wherein operations further comprise updating the first threshold and the second threshold upon the viewer returning to a schedule list more than a predetermined number of times.

11. (original) The machine-readable medium of claim 7, wherein operations further comprise setting the first threshold to be a first percentage of a period of time that a channel was viewed, and setting the second threshold to be a second percentage of the period of time that the channel was viewed.

12. (original) The machine-readable medium of claim 7, wherein operations further comprise: adding to the first set of broadcasted programs a fifth set of broadcasted programs, the fifth set of broadcasted programs including broadcasted programs selected by a viewer a number of times at least equal to a third threshold; and removing from the first set of broadcasted programs a sixth set of broadcasted programs, the sixth set of broadcasted programs including broadcasted programs not selected by a viewer a number of times at least equal to a fourth threshold.

13. (original) A system comprising: a first unit to add to a first set of broadcasted programs a second set of broadcasted programs, the second set of broadcasted programs including broadcasted programs viewed by a viewer for a period of time at least equal to a first threshold; and a second unit coupled with the first unit to remove from the first set of broadcasted programs a third set of broadcasted programs, the third set of broadcasted programs including broadcasted programs not viewed by a viewer for a period of time at least equal to a second threshold.

14. (currently amended) The system of claim 13, wherein the first unit is further to add to the first set of broadcasted programs a fourth set of broadcasted programs manually

selected by the viewer.

15. (original) The system of claim 13, wherein the first unit is further to update the first threshold and the second threshold upon the viewer indicating dissatisfaction.

16. (original) The system of claim 13, wherein the first unit is further to update the first threshold and the second threshold upon the viewer returning to a schedule list more than a predetermined number of times.

17. (original) The system of claim 13, wherein the first unit is further to set the first threshold to be a first percentage of a period of time that a channel was viewed, and to set the second threshold to be a second percentage of the period of time that the channel was viewed.

18. (original) The system of claim 13, wherein the first unit is further to add to the first set of broadcasted programs a fifth set of broadcasted programs, the fifth set of broadcasted programs including broadcasted programs selected by a viewer a number of times at least equal to a third threshold, and wherein the second unit is further to remove from the first set of broadcasted programs a sixth set of broadcasted programs, the sixth set of broadcasted programs including broadcasted programs not selected by a viewer a number of times at least equal to a fourth threshold.
